

Add solar to your home for energy savings and security.

A graphic of a solar panel is shown in the bottom right corner, appearing as if a white corner of the green background has been peeled away to reveal a dark blue grid pattern representing solar cells.

**Simply Smarter Solar.**

PV Solar Electricity

# Adding Solar NOW Comes With Added Benefits

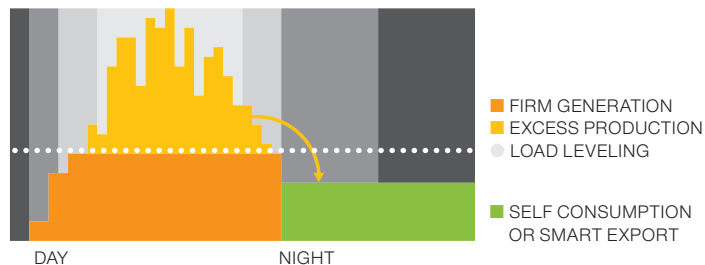

KumuKit™ PV systems maximize production and optimize energy efficiency with top-tier LG® panels, powerful Enphase® microinverters, smart Energy Management Control and advanced energy storage with Powerblocks™ safe LG Chem® battery technology. These hybrid systems allow

you to save solar energy for use at night, smart export, take advantage of lower utility time-of-use rates and opt-in to utility demand response programs with no additional equipment. An intuitive Energy Dashboard makes it easy to monitor your system. Compare your energy production with your energy

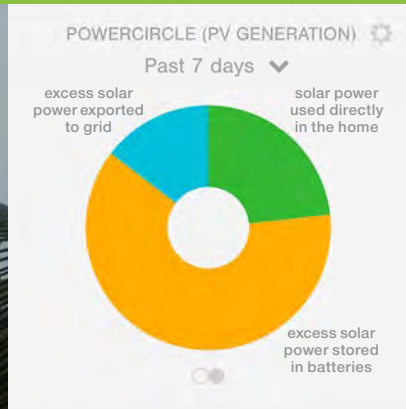

usage. Manage select home loads with detailed visibility and historical reporting capabilities. Control battery usage. The system's automatic emergency backup feature provides power for critical loads during grid outages, empowering you with energy security and self-sufficiency. It's your power, your way.

SAVE THE DAY. POWER THE NIGHT.

# Smart Energy Storage for Added Peace of Mind

All the tools to monitor and manage your PV System in one place. Opt-in to Utility incentive programs.

c  US LISTED

Generate solar power during the day and use it at night. Have an alternate power supply during Utility grid outages.

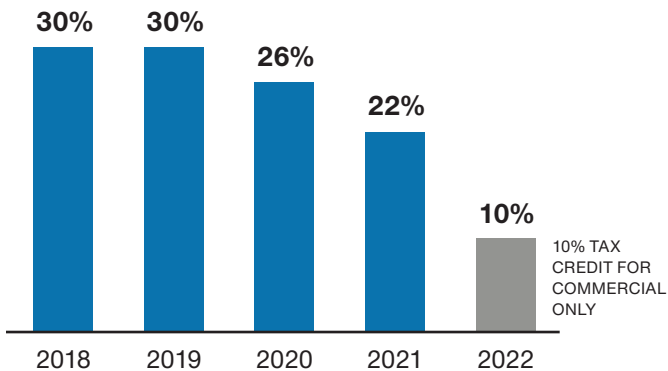

# Add solar power to your home and get energy savings and security.

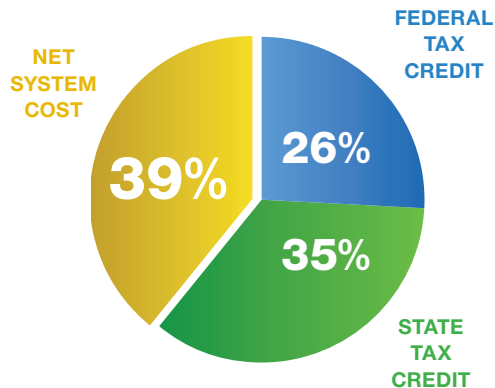

Solar Electricity

Powerblocks 

KumuKit™ PV systems designed for the CGS+ Utility Program are paired with **Powerblocks™** advanced energy storage and are right-sized to your home's energy usage to offset your energy costs at full retail rates. Act *now* to receive up to **full 65% in available Tax Credits** before they're reduced at end of 2019. Contact us to see how a KumuKit™ can work for you.

FEDERAL TAX CREDIT FOR HOMEOWNERS ENDS 2022

## GRID INTERCONNECTION PROGRAM

### Customer Grid-Supply Plus

Under the CGS+ Program, *new* solar customers are credited for the excess solar energy their system sends to the Utility grid. CGS+ Systems must include grid support technology.

We build quality into every KumuKit™ with top-tier PV panels, superior microinverter technology, **Powerblocks™** advanced energy storage and innovative energy management. These hybrid systems allow you to take advantage of the latest utility interconnection and saving programs.
