

Add more solar without voiding your NEM Agreement

A graphic in the bottom right corner showing a white corner of a page peeling away from a dark blue background with a grid of solar panel cells.

Simply Smarter Solar.

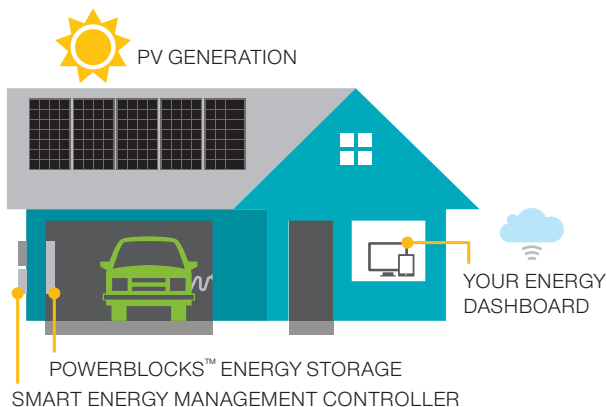

Adding More Solar NOW Comes With Added Benefits

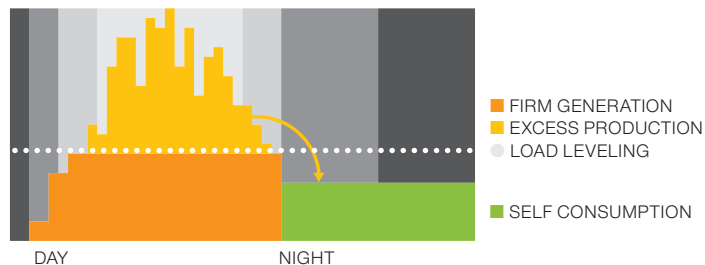

KumuKit™ PV systems maximize production and optimize energy efficiency with top-tier LG® panels, powerful Enphase® microinverters, smart Energy Management Control and advanced energy storage with Powerblocks™ safe LG Chem® battery technology. These hybrid systems

allow you to save solar energy for use at night, take advantage of lower utility time-of-use rates and opt-in to utility demand response programs with no additional equipment. An intuitive Energy Dashboard makes it easy to monitor your system. Compare your energy production with your energy

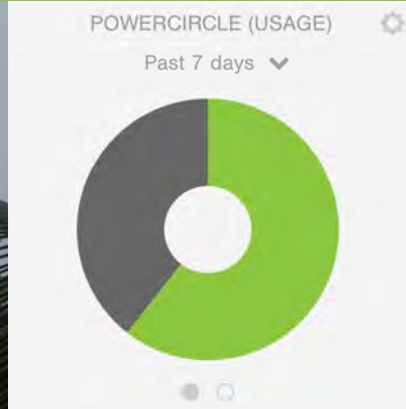

usage. Manage select home loads with detailed visibility and historical reporting capabilities. Control battery usage. The system's automatic emergency backup feature provides power for critical loads during grid outages, empowering you with energy security and self-sufficiency. It's your power, your way.

SAVE THE DAY. POWER THE NIGHT.

Smart Energy Storage for Added Peace of Mind

All the tools to monitor and manage your PV System in one place. Opt-in to Utility incentive programs.

 US LISTED

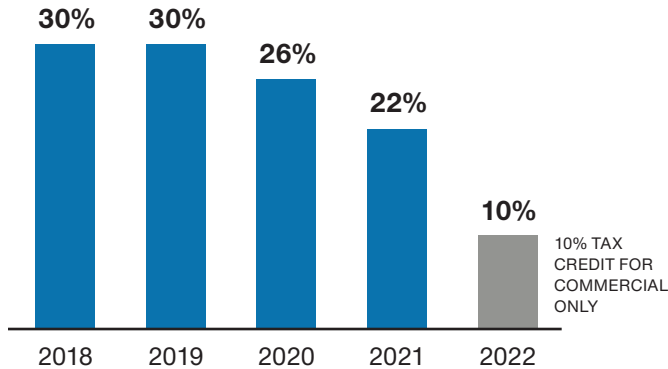

Generate more solar power during the day and use it at night. Have an alternate power supply during Utility grid outages.

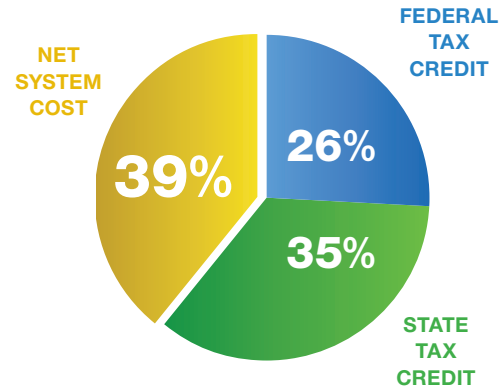

NOW you can add more solar power without voiding your NEM Agreement!

KumuKitTM systems designed for the *new* NEM+ Utility Program allow you to add more PV capacity to *any* existing NEM-approved PV system to offset *more* of your energy costs at full retail rates and are eligible for *additional* tax credits. Act *now* to receive up to **full 61% in available Tax Credits** before they're reduced again at the end of 2020. Contact us to see how a KumuKitTM add-on can work for you.

FEDERAL TAX CREDIT FOR HOMEOWNERS ENDS 2022

GRID INTERCONNECTION PROGRAM

Net Energy Metering Plus

Under the NEM+ Utility Program, solar customers with existing NEM agreements can add on to their solar system. The add-on will increase on-site capacity but will not export energy to the grid.

N E M +

We build quality into every KumuKit™ with top-tier PV panels, superior microinverter technology, **Powerblocks™** advanced energy storage and innovative energy management. These hybrid systems allow you to take advantage of the latest utility interconnection and saving programs.
